A comprehensive service

At Smilecare, we want you to have strong, healthy teeth for life, which is why we place so much emphasis on preventive dentistry.

Our committed and dedicated team of dentists, hygienists, and dental nurses all play a vital role in helping you achieve and maintain ideal oral health. In particular our hygienists provide you with a professional clean and polish that can help prevent

or combat gum disease and they will also advise you on the best way to care for your teeth and gums. Regular routine check-ups with our dentists are also essential, as it means we can treat any potential problems at an early stage.
